

Wallock

Strong - Stylish - Sustainable

Partner with Wallock

Welcome to a revolution in **sustainable** wall storage solutions for the home and garage.

We are actively **seeking to partner** with like minded businesses that are currently in the home improvement space whether you are a garage makeover company, garage door installer, professional organiser or interior designer.

We can offer your clients a **design led storage system** that is not only functional but sustainable too. Our Natural Plywood base and accessories are sustainably sourced and beautifully engineered.

hello@wallock.co.uk | www.wallock.co.uk

Who are we?

Hello, we're Wallock and we're thrilled to bring our **innovative storage system** to homes, garages, and commercial spaces across the UK.

Our **fresh and modern** approach to home and garage storage dilemmas combine clever, practical design, unparalleled functionality, and a commitment to environmental sustainability.

How does it work?

Our Wall Panels are crafted from a beautiful birch and tough Hexa plywood foundation which offers exceptional **strength and durability**. Begin by mounting our wall panels on the wall, then seamlessly attach the customer's preferred storage accessories to the panel to create a functional storage space that's unique to their hobbies.

More about our Panels

Our range of modular wall panels are built with **sustainably sourced** Birch or tough Hexa Plywood. These panels showcase the natural beauty of birch ply and are securely affixed to the wall.

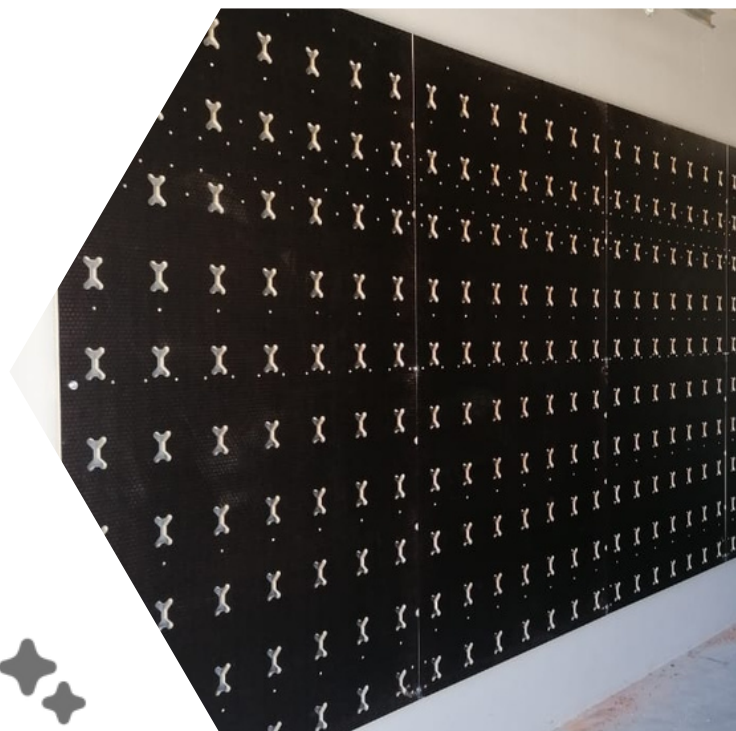

Panel Size Options:

Wide: 2140mm (h) x 1200mm (w)

Narrow: 2140mm (h) x 510mm (w)

Landscape: 1095mm (h) x 1200mm (w)

All panels are 15mm in thickness

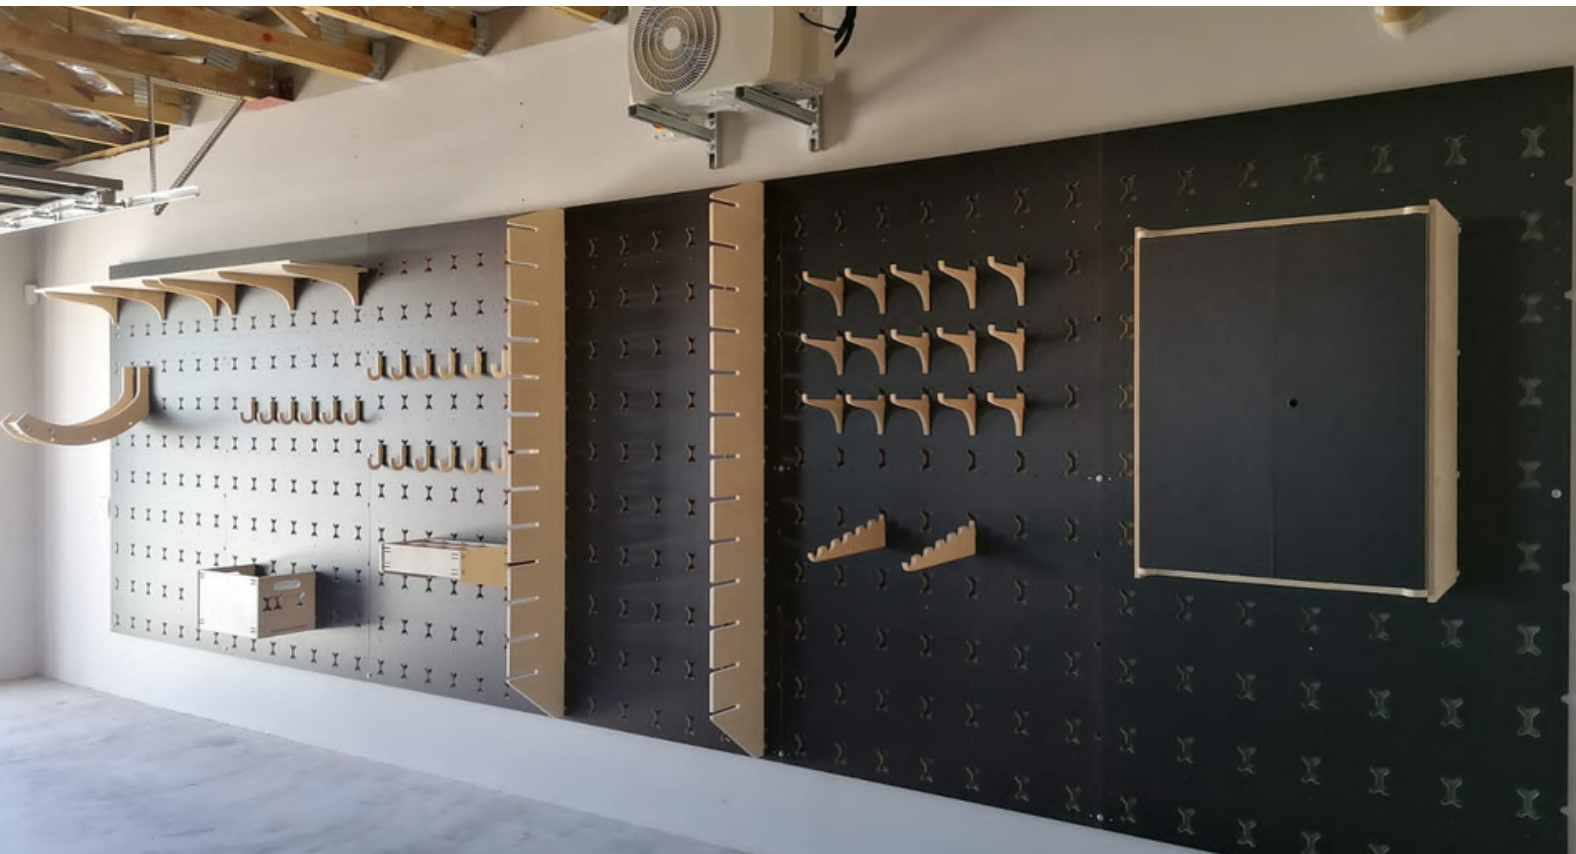

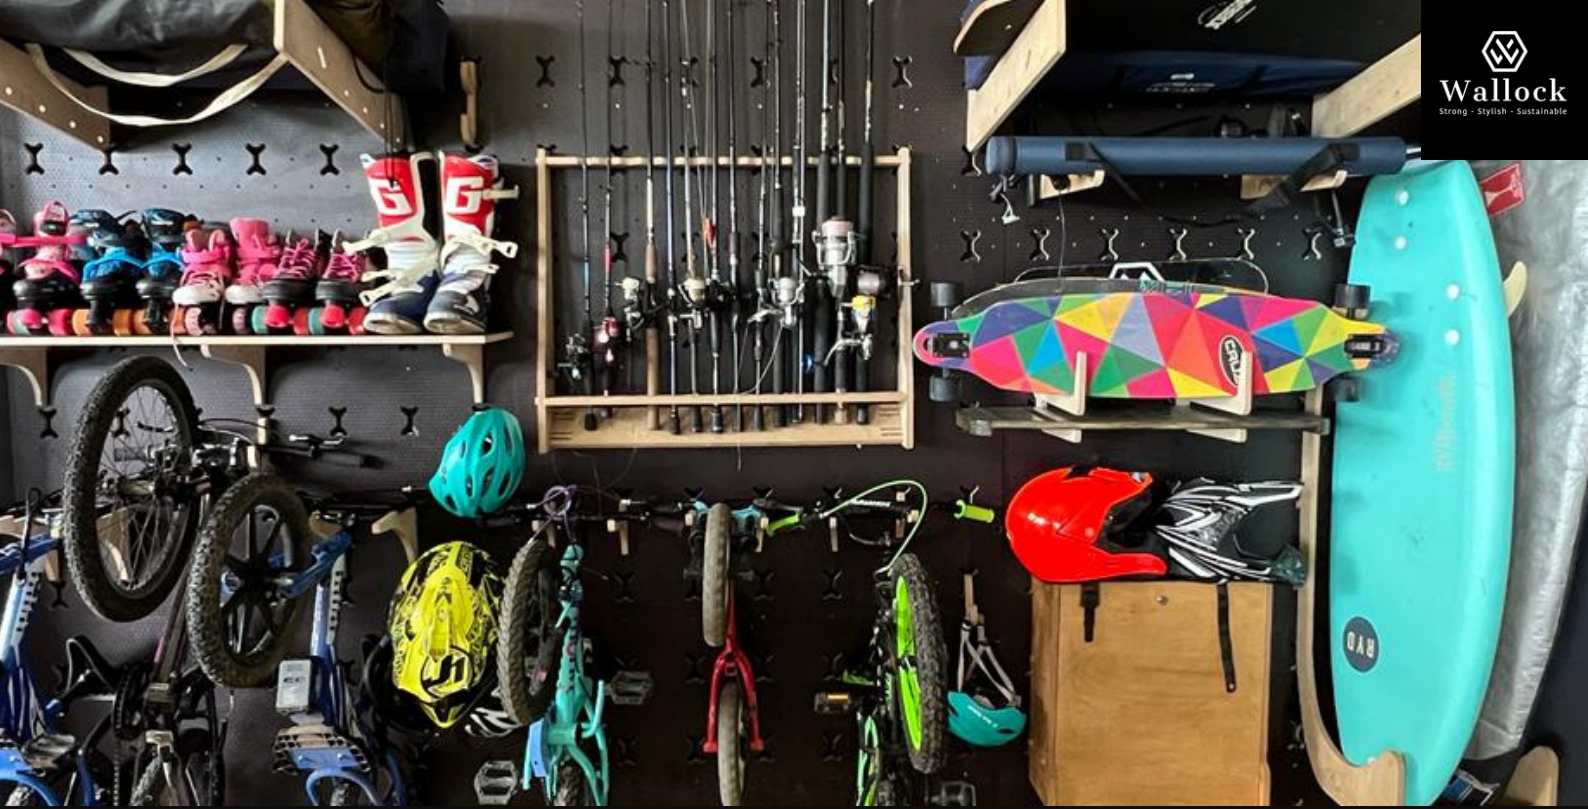

Measuring Up

Whilst you are on site we recommend measuring your client's space to determine which panels are the **most suitable**. You can then select the most appropriate size from our three wall panel options.

Easy to Install

Our Wall Panels are extremely easy to install using our CNC machine metal french cleat. One side of the panel will already be attached to the rail whilst the other side just needs to be fixed to the wall at the desired height. Or you can simply use a simple split timber battens. We can provide **full instructions** and talk you through how it works.

There's a storage accessory for almost every passion

Whether your customer is passionate about getting out on their bike or focused on the next hole in one, our **customised solutions** are perfectly suited to all hobbies and activities.

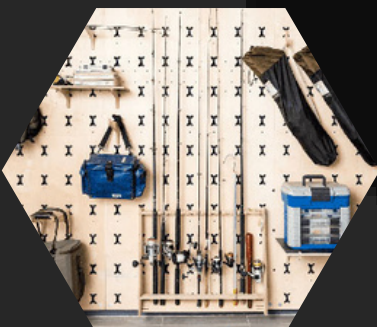

Cycling

Board Sports

Golf

Fishing

Equestrian

Wine

What's in it for you?

Partners will receive a trade discount and be able to charge their client an **installation fee**. We will deliver your chosen products to site on an agreed date and even forward on our own leads for follow-up, enabling an up-sell of your own products and services. We will also list you on our website as a preferred partner.

National Coverage

We have manufacturing partners **throughout the UK** which enables a quick production turnaround and delivery.

Our Commitment to Sustainability

Wallock's commitment to sustainability spans every aspect of our operations, from sourcing materials exclusively from **PEFC and FSC certified mills** to strategically distributing production facilities to minimise carbon emissions. Our wall storage solutions are not only designed with recyclability in mind but also serve as a statement of commitment to the planet. By integrating our **eco-conscious solutions** into your living space, you're not just organising belongings – you're actively contributing to a greener future, one wall at a time.

Get in Touch

We would love to discuss how you can bring this to your customers, please call us on **0800 861 1779**.
